

Project 7 - City of Bathurst

RBC
Blue Water
Project™

<http://bluewater.rbc.com/projectDetails.php?id=7>

The City will conduct a riparian zone inventory of the Middle River and Carter's Brook watersheds which supply drinking water to the City of Bathurst and the Town of Beresford. The project will also work to mitigate the impact of watershed effluent in the Nepisiguit Drainage Basin by connecting government, business and the community, and encouraging residents to get involved.

For example, the City will provide 6500 homeowners with a Home Water Audit form to encourage reduction in their home water use. And will conduct school and public presentations on watershed protection and water conservation.

RBC branches in New Brunswick celebrated this project as part of our 2010 RBC Blue Water Day

Organization Information

Organization:	Bathurst Sustainable Development
Location:	Bathurst, New Brunswick, Canada
Focus Area:	Safe Drinking Water
Year grant given:	2008
Grant amount⁽²⁾:	\$85,000.00
